PERMIT APPLICATION REVIEWS

The Committee reviewed the following permit applications:

- **Town of Goffstown, 11 Glenwood Drive, Goffstown, NH, Map 36, Lot 38. Standard Dredge and Fill Wetlands Permit #Unknown.** The project is to construct a paved "hammerhead" style turnaround at the terminus end of Upton Lane. The turnaround is required for safe operation of the towns fire apparatus, snowplows, and sanitation vehicles. The turnaround is located on private property on which the Town has a recorded easement to construct the turnaround. The project will entail fill being permanently placed within the delineated wetland. Construction of the paved turnaround will also require the installation of a culvert to convey surface water that may become trapped due to the added fill of the turnaround.
