RE: AOT-2194; NHDES Shoreland 2022-01558, Goffstown

The Piscataquog River Local Advisory Committee (PRLAC) reviewed the subject AOT and Shoreland Permit Applications (for amendments) at our December 23, 2025 meeting and provide the following comments:

1. **Mr. Nick Golon attended the PRLAC meeting and provided a summary of the original permit and amendment request, and answered to all our questions. We appreciate his willingness to do this.**
2. **We understand that there is no change in impervious surface area because one type of impervious surface (gravel) is being replaced with another type (concrete).**
3. **We understand that the existing low area will be dredged and plants including knotweed will be removed, and that this low area will function as stormwater management.**
4. **We understand that the seed mix to be used is that recommended by NH Fish and Game Department.**
5. **We are concerned with contaminants potentially being deposited in the stormwater area in the long-term and would like to know if there is anything in the permitting that can address this.**
6. **Is there in the rules the potential for mitigation given that some of the impervious pole storage area will be within 100 feet of Glen Lake?**
7. **Mr. Golon sent the PRLAC the 2022 plans and some updated information early on, but that did not include the shoreland application or updated plans. John Magee failed to notice this till the night of the PRLAC meeting. Mr. Golon is going to send the full application and plans to the PRLAC.**

Sincerely,

John Magee, Chair, PRLAC, [mooseseer@tds.net](mailto:mooseseer@tds.net)
