RE: NHDES Shoreland 2026-00054, Weare

The Piscataquog River Local Advisory Committee (PRLAC) reviewed the subject Shoreland Permit Application at our January 27, 2026 meeting and provide the following comments:

- Recommend the use of wildlife friendly erosion control fabric and materials.
- Reclamation seeding and plantings should use only native species and any reclamation should avoid bio-solid based products.
- Follow the recommendations of the New Hampshire Fish and Game Department.

We note that, in Section 10 of the application, the applicant selected that it is not within ¼ mile of a Designated River, but the property is indeed within ¼ mile of the Piscataquog River, and this is shown on the Designated River Corridor Mapper. Furthermore, the NHDES Rivers Program staff sent the notification of this application to the PRLAC on January 12, 2026. We request that the Shoreland Application be revised to help applicants determine the correct answer to this item by providing the link to the Designated River Corridor Mapper (<https://experience.arcgis.com/experience/20bcd62420ee4952b343290cbeed2e9a/>), which is on the Rivers Management and Protection webpage (<https://www.des.nh.gov/water/rivers-and-lakes/rivers-management-and-protection>).

Sincerely,

John Magee, Chair, PRLAC, [mooseseer@tds.net](mailto:mooseseer@tds.net)
